DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-35, drawn to a method/system for issuing digital certificates for an electronic payment system classified in class 705, subclass 76.
 - II. Claim 36-65, drawn to a method for securing payments of a corporation using a third party financial services provider, classified in class 705, subclass 78.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as matching each of the at least one pending corporate payment requests against a record of a corresponding entry in an accounting system of the corporation and validating only those corporate payment requests having corresponding entries in the accounting system, a validation of each collected pending payment request by an authenticated certificate holder being a condition precedent to the payment request clearing an account of the corporation at the FSP. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 3621

4. A telephone call was made to Alan W. Young (Reg. NO. 37, 970) on December 2, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
